### **PaySimple Partners with Pioneer Technology Group to Provide Payment Processing Capability to Tax Collection System**

*PaySimple now provides online payment processing functionality to Pioneer Technology Group's custom developed tax collection system for County Governments.*

**DENVER, CO, March 26, 2007** –PaySimple, an industry-leading provider of payment management solutions for businesses, is pleased to announce its partnership with Pioneer Technology Group, a custom developed systems provider to County Governments. By partnering with PaySimple, Pioneer Technology's tax collection systems can now seamlessly manage taxpayers' account information as well as process ACH direct debits, electronic checks, and credit cards through PaySimple's virtual gateway.

Pioneer Technology Group offers a variety of products and services to County Governments ranging from customized tax systems to electronic document systems. Its primary product, Excise, automates the process of calculating and collecting the Tourist Development Tax, a bed tax for special districts. The system collects and manages account information, reports statistical and financial data, and now seamlessly communicates with PaySimple's payment gateway to enable taxpayers to remit payments via a secure online form.

"We switched from another payment processor to PaySimple to integrate with our systems and improve our efficiency, said Rich Connor, CTO of Pioneer Technology. "We are very pleased with the ease of integration, and already have satisfied customers using the new system."

"We're pleased that Pioneer Technology Group was able to significantly increase their products' efficiency by incorporating PaySimple payment processing functionality," said Eric Remer, CEO of PaySimple. "PaySimple is an ideal solution for organizations like Pioneer Technology that want to provide total system solutions that streamline payment collection processes."

PaySimple's online gateway technology has the versatility to support either a payment page hosted on its own secure server, or one hosted on the business's secure server. The system collects payment information from the online form and submits it directly into the PaySimple gateway for payment processing, with no double entry. With this online payment functionality, Pioneer Technology Group offers its tax collection software to County Governments, enabling taxpayers to submit their tax payments via electronic check, ACH direct-debit, or credit card from the county's website.

For more information about PaySimple and its payment processing gateway, visit the company website at [www.paysimple.com](http://www.paysimple.com) or call 800.466.0992. For more information about Pioneer Technology Group, visit [www.ptghome.com](http://www.ptghome.com) or call 800.280.5281.

**About PaySimple:** PaySimple is an industry-leading provider of payment management solutions. PaySimple simplifies billing and collection processes by enabling customers to invoice, collect and deposit all of their payments automatically. The customized, secure ASP solution includes auto-recurring billing, electronic check processing, direct debit and credit card processing at some of the lowest rates available. PaySimple seamlessly integrates with most business management software. Based in Denver, Colorado, PaySimple sells its system direct to end-users and via partners who provide total business software solutions. [www.paysimple.com](http://www.paysimple.com).
