ORANGE COUNTY FL, TO INSTALL NEW TOURIST TAX SYSTEM

Maitland, Florida -- (May 2007) -- Pioneer Technology Group, a provider of custom developed software to County Government, announced that the Orange County, Florida, Comptroller has decided to implement Excise, its Tourist Development Tax System. This announcement comes on the heels of the successful completion of a project with the Orange County Value Adjustment Board. Pioneer Technology Group successfully installed its AXIA VAB system in March, 2007.

Excise will provide for web based access to allow business registration and online remittance, accepting ACH, escrow account and credit card payments. Tax payers will now have access to all their account activity through a secure website. Account holders will have the ability to view and calculate the amount of tax as well as any interest and penalties that may be due on their account.

"Pioneer Technology Group calls Orange County home which only adds to the excitement surrounding the addition of Orange County to our growing family of Excise Customers," said Steve T Rumsey, President and CEO of the Maitland based company.

Excise will enable Orange County to increase compliance through the use of advanced tracking and search features. The system has extensive audit tracking capabilities that integrate with the Property Appraiser's Office, and the Department of Revenue, to share information such as building permits, non-homesteaded condo/homes, and commercial properties.

About Pioneer Technology Group

Pioneer Technology Group is a provider of software products to County Government specifically targeting County Clerks, Comptrollers, Property Appraisers and Tax Collectors. Pioneer Technology also provides consulting services to counties in the areas of electronic document transmission, recording and workflow management.
